Auto-enrollment upon course completion

Ester Andersson - 2024-10-27 - [Functions](#)

Auto-enrollment upon course completion is a function that lets the system automatically enroll a learner in a new course when another course is completed.

1. Go to the course you want your learners to complete to be enrolled in another.
2. Under "Next course", click "Add next course". Choose the course your learners should be enrolled in.
3. Create an automated communication in the next course to let the system automatically send a welcome email to all registered participants (not mandatory).
4. Your learners now have access to the course!

The screenshot shows the 'Introduction to Learnifier' course page in the Learnifier interface. The page is divided into several sections:

- Header:** Includes the Learnifier logo, navigation tabs (Dashboard, Projects, Users, Library, Reports, Automations, Settings), and user information (Go To, Search, Notifications, Demo).
- Course Overview:** Displays the course title 'Introduction to Learnifier', creation and update dates, and action buttons (Edit course, Preview, Delete, Copy).
- Participants:** Shows 9 participants with a status of 'Ongoing'. A progress chart indicates 5 Not Started, 3 In Progress, and 1 Completed.
- Awards:** Section for attaching a diploma or certificate to the course.
- Next Course:** Section for automatically enrolling learners that have completed this course into a following Next Course. A green arrow points to the 'Add Next Course' button.
- Project Team:** Section for adding team members to the project.
- Discussions:** Section for sharing thoughts with a text input field and a 'Post' button.
- Announcements:** Section for adding announcements.
