

## Auto-enrollment upon course completion

Ester Andersson - 2024-02-15 - Functions

**Auto-enrollment upon course completion is a function that lets the system automatically enroll a learner in a new course when another course is completed.**

1. Go to the course you want your learners to complete in order to be enrolled in another.
2. Under "Next course", click "Add next course". Choose the course your learners are to be enrolled in.
3. Create an automated communication in the next course to let the system automatically send a welcome email to all registered participants (not mandatory).

The screenshot shows the Learnifier course management interface for a course titled "Introduction to Learnifier". The course is currently in an "Ongoing" status. The interface includes a navigation bar with options like Dashboard, Projects, Users, Library, Reports, Automations, and Settings. Below the course title, there are buttons for "Edit course", "Preview", "Delete", and "Copy".

The main content area is divided into several sections:

- 9 participants:** A section showing the number of participants and their status. It includes a progress indicator with 9 participants and a legend for status categories: Not Started (5), In Progress (3), Completed (1), On Track (9), Overdue (0), Not Invited (0), Bounce Backs (0), and Project Errors (0).
- Awards:** A section for attaching a diploma or certificate to the course. It includes an "Attach" button.
- Next Course:** A section for automatically enrolling learners who have completed this course into a following course. It includes an "Add Next Course" button. A green arrow points to this section.
- Project Team:** A section for adding team members to the project. It includes an "Add Team Member" button.
- Announcements:** A section for creating announcements, indicated by a speech bubble icon.

At the bottom, there is a "Discussions" section with a "Share your thoughts" input field and a "Post" button.
