

## Email templates

Ester Andersson - 2024-06-18 - The library

**If you want to customize your learning portal, we recommend that you create your own or customize already existing email templates.**

Note

- [Editing an email template](#)
- [Tip!](#)

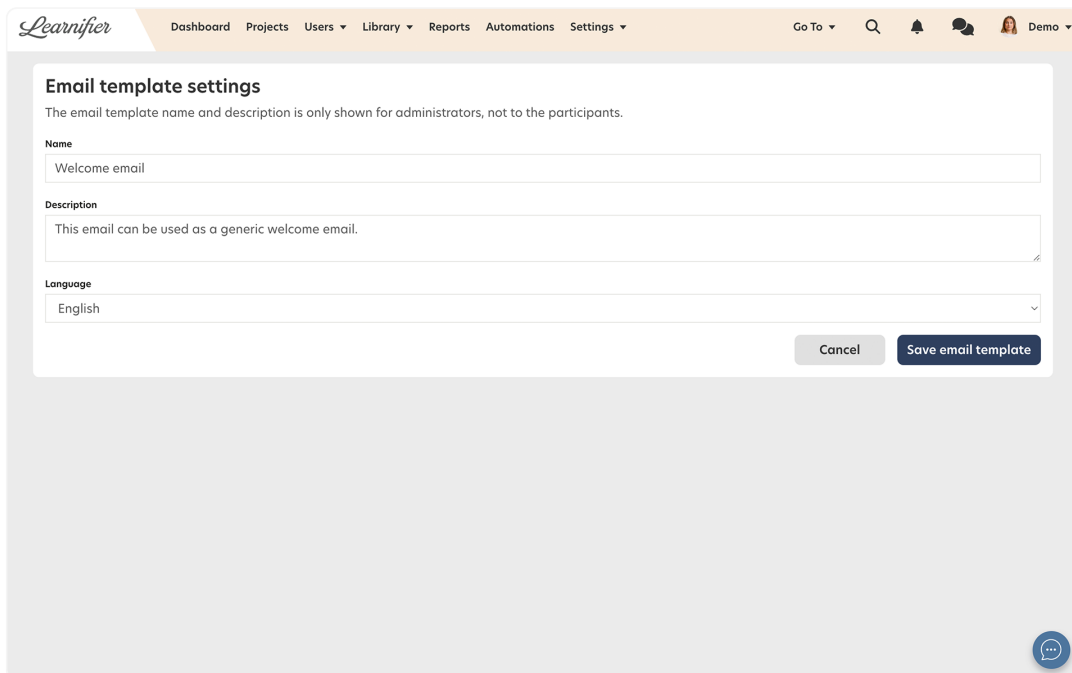

### Adding a new template

1. Go to the library and click "Email templates".
2. Click on "Add Email Template" **or** create a copy of a generic email template by clicking on the one you wish to copy and thereafter clicking "Copy" (this way you don't have to build an email structure from scratch)

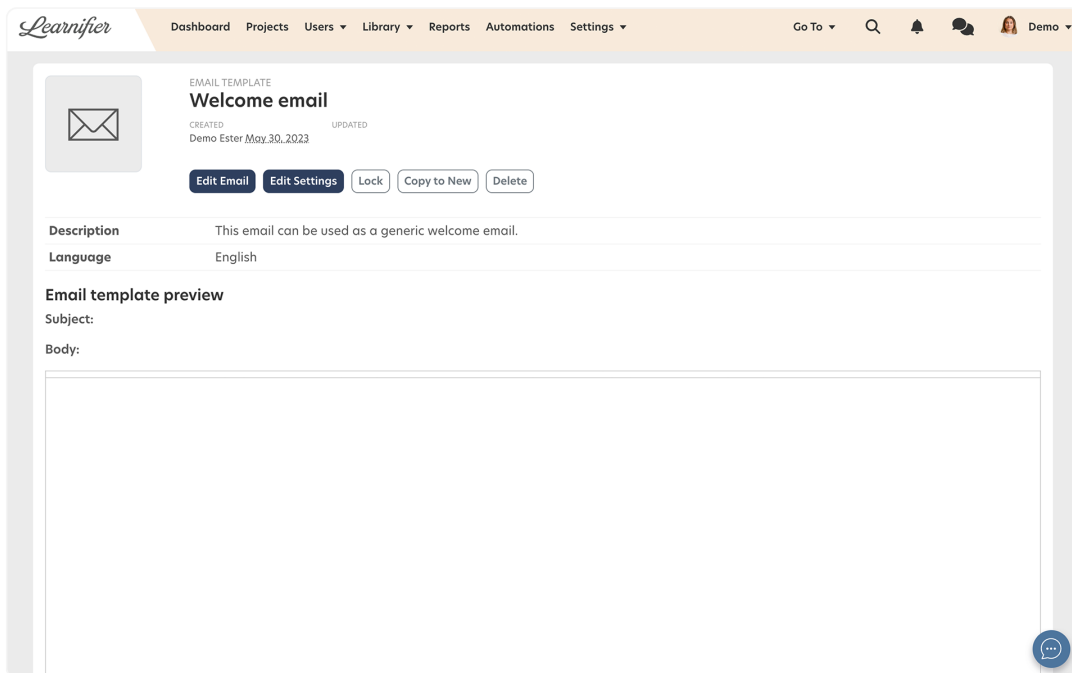

1. Enter a name, description, and language (only visible for administrators) in the fields.

2. Click on "Save email template" in order to save your changes.

The screenshot shows the 'Email template settings' page in the Learnifier dashboard. The page has a navigation bar at the top with 'Learnifier' on the left and 'Dashboard', 'Projects', 'Users', 'Library', 'Reports', 'Automations', and 'Settings' in the center. On the right side of the navigation bar are 'Go To', a search icon, a bell icon, a chat icon, and a user profile icon labeled 'Demo'. The main content area is titled 'Email template settings' and includes a note: 'The email template name and description is only shown for administrators, not to the participants.' Below this note are three input fields: 'Name' with the value 'Welcome email', 'Description' with the value 'This email can be used as a generic welcome email.', and 'Language' with a dropdown menu set to 'English'. At the bottom right of the form are two buttons: 'Cancel' and 'Save email template'.

1. When you have saved your changes a new window will open. Click on "Edit Email" to start making edits.

The screenshot shows the 'Welcome email' template details page in the Learnifier dashboard. The page has the same navigation bar as the previous screenshot. The main content area is titled 'EMAIL TEMPLATE' and 'Welcome email'. It includes a mail icon, a 'CREATED' date of 'Demo Ester May 30, 2023', and an 'UPDATED' date. Below this are five buttons: 'Edit Email', 'Edit Settings', 'Lock', 'Copy to New', and 'Delete'. The 'Description' field contains the text 'This email can be used as a generic welcome email.' and the 'Language' field is set to 'English'. Below these fields is an 'Email template preview' section with 'Subject:' and 'Body:' labels, followed by a large empty text area for the preview content. A blue chat icon is visible in the bottom right corner.

1. Create your email template and save your changes!

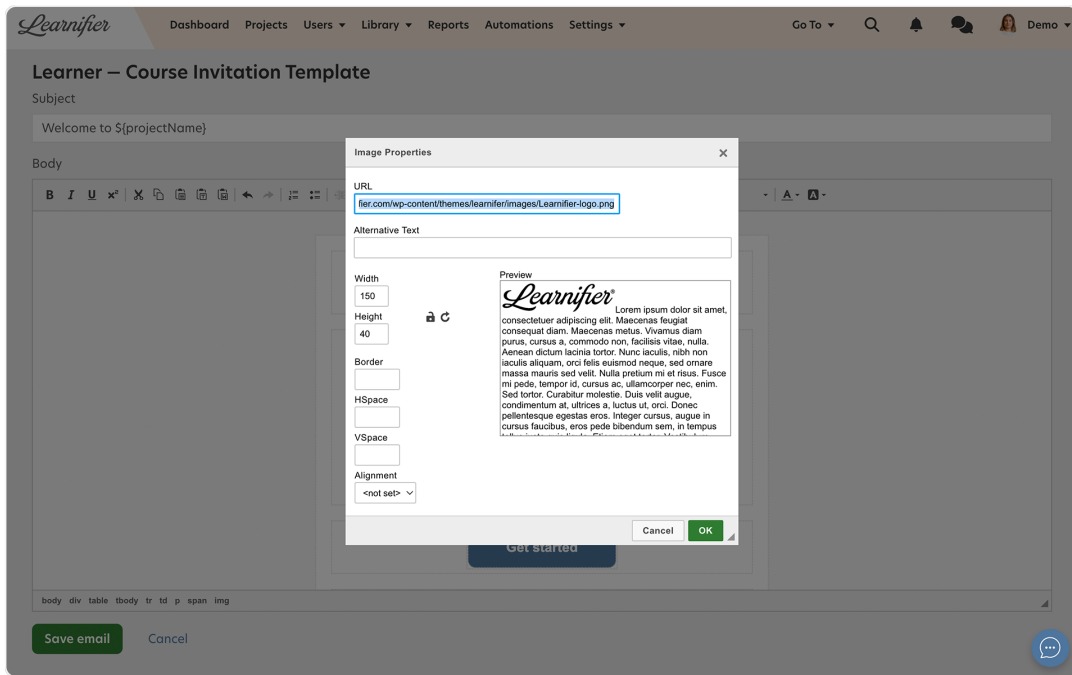

## Editing an email template

### Adding an image

1. Select the image and click on the image icon in the menu.

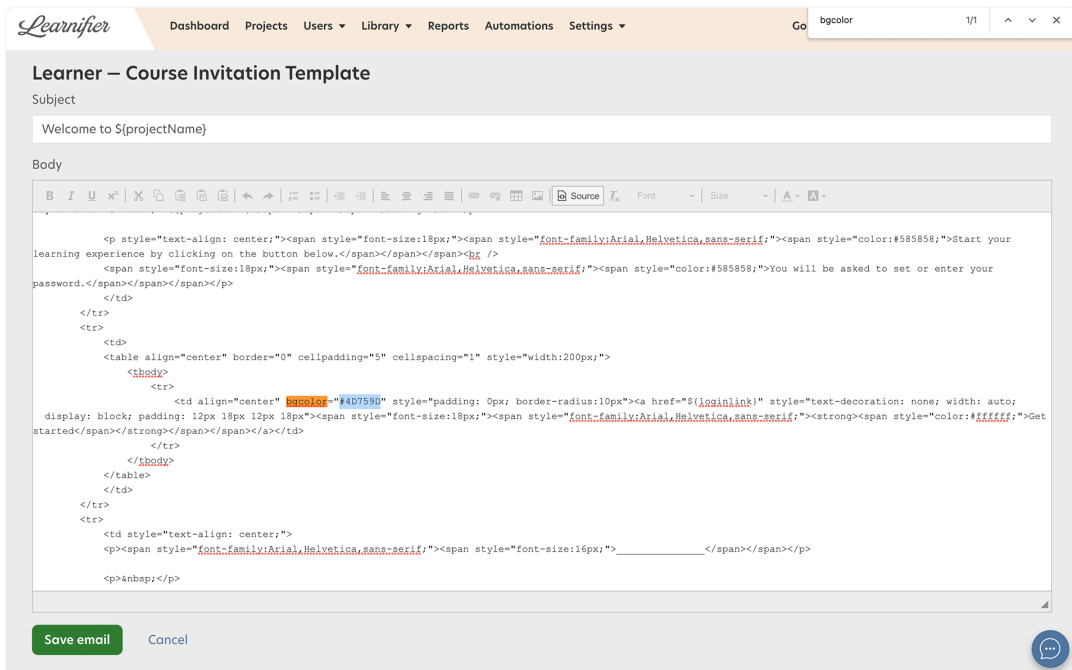

1. Add the URL to the new image and adjust the size so it fits your email.

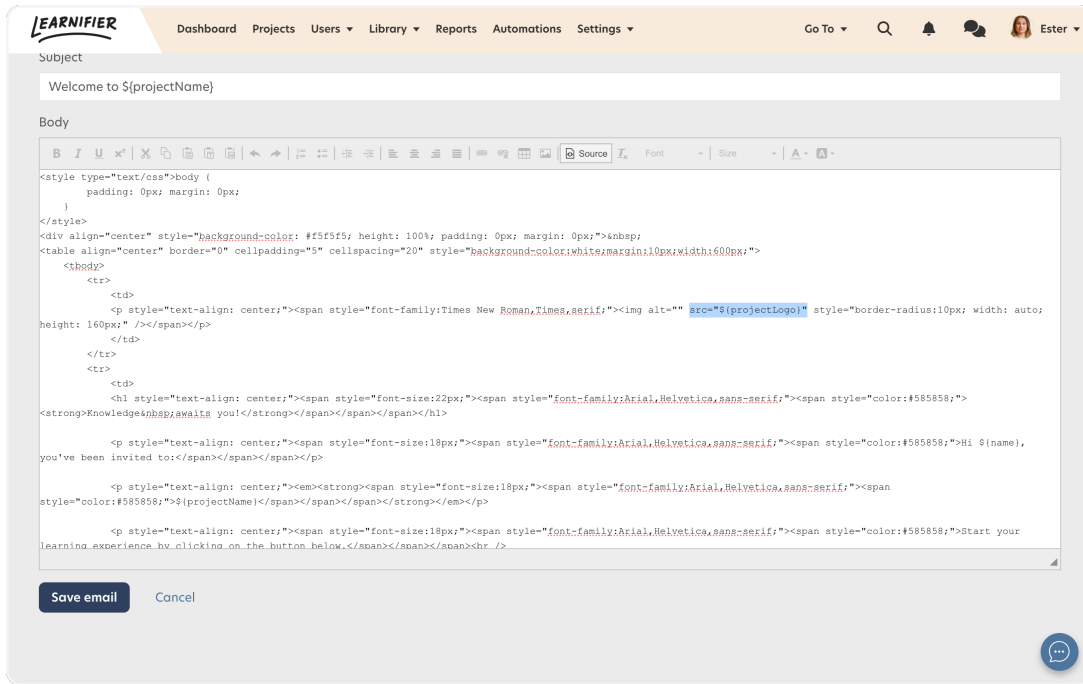

## Changing the color of the “Get started” button

To change the color of the “Get started” button, enter the email template builder and click “Source”. Search for “bgcolor” and add the HEX color of your choice.

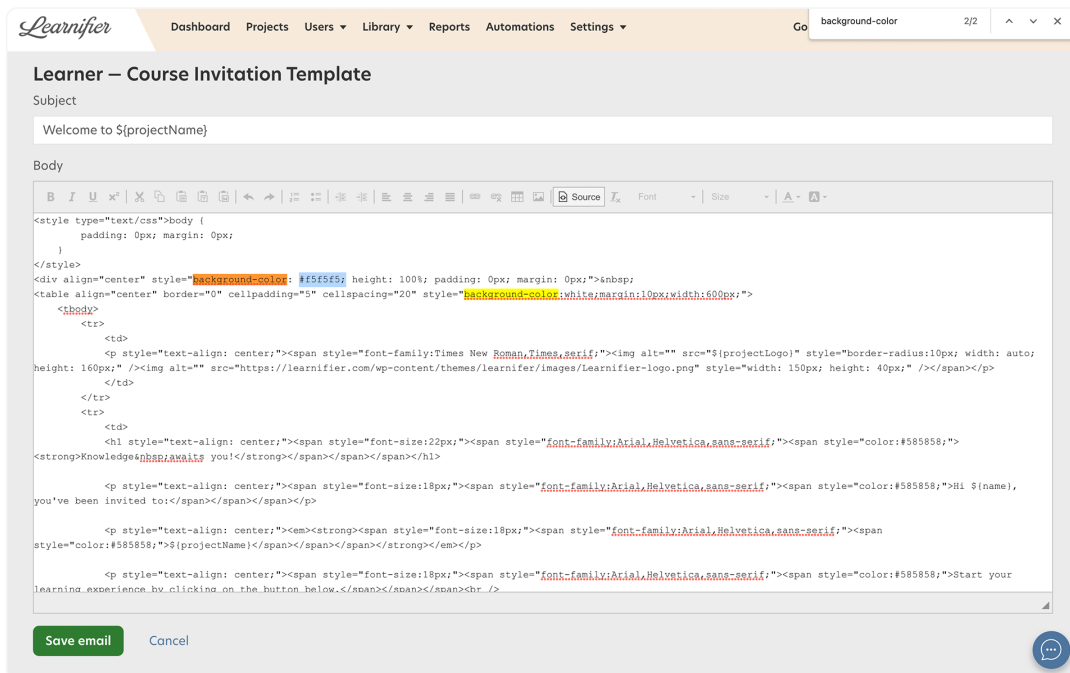

## Adding the project image

If you wish to add the project image to the email template, add the variable `${projectLogo}` in the HTML code.

## Changing the background color

To change the background color of the email template, search for “background-color” (the first one) and change it to the HEX color of your choice.

## A tip

If you wish your instructors to use specific course templates, but they must change a few things in the email depending on where they're using it, we recommend marking the words that need to be changed with **red**.
