Preview – Important to Know

A Latimore - 2025-10-08 - [Trouble shooting](#)

When you preview a course in Learnifier, it's important to understand that **where you preview from makes a difference**:

- **From the project page:**

If you click *Preview* here, you'll see the **LIVE version** of the course – even if you haven't published your latest changes yet.

- **From the course builder:**

If you click *Preview* inside the course builder, you'll see **the unpublished version** – meaning how the course looks with your most recent edits.

Tip:

Want to check your latest changes before publishing?

Use *Preview* from the course builder.

Want to see what participants are currently seeing? Use

Preview from the project page.

An even better way to see *exactly* what participants see is to **add yourself as a participant in the course** – that way, you'll experience it just like a learner would.
