How to set up SCIM

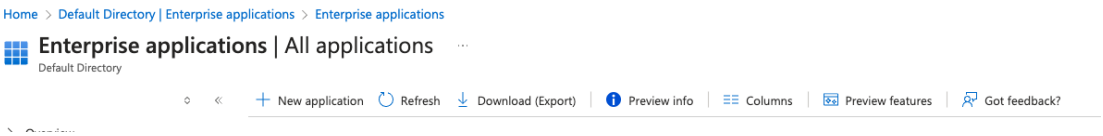

Ester Andersson - 2026-08-05 - API, SAML, integrations and general settings

To follow the instructions below, ensure you've received the secret token from Learnifier.

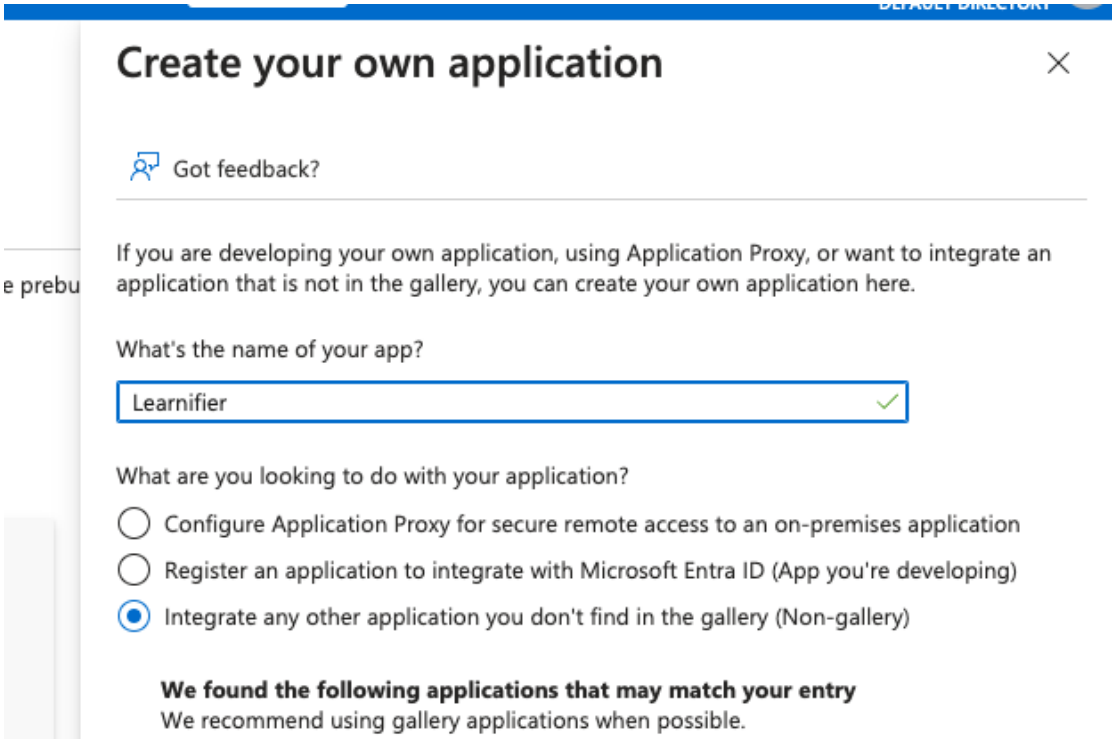

1. Go to Azure and open Microsoft Entra ID.
2. Locate "Enterprise applications".

1. Select "New application".

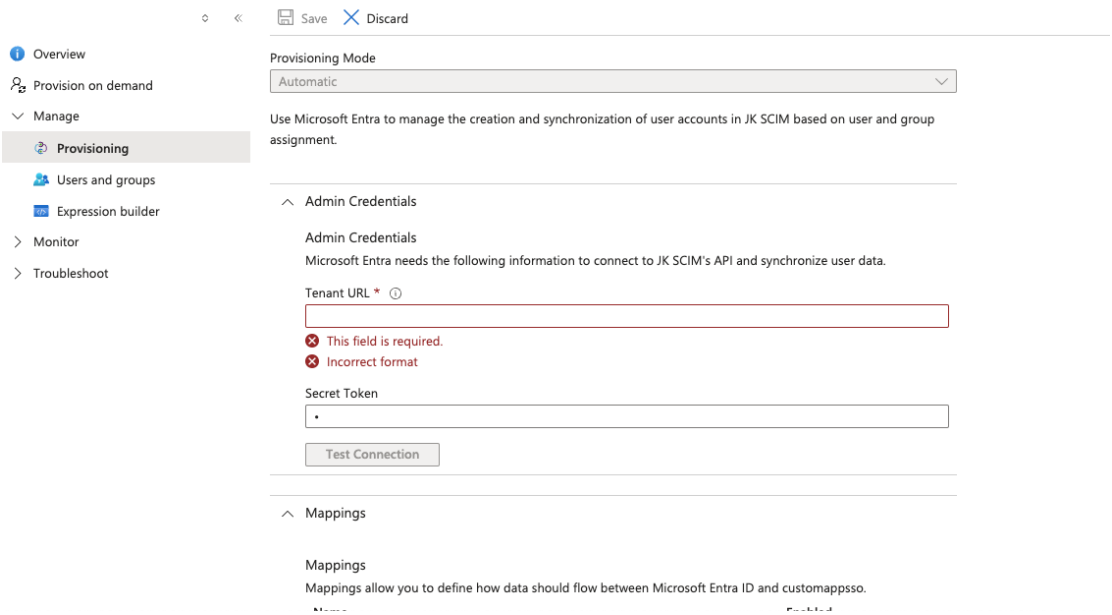

1. Create your own application, name the app, and select "Integrate any other application you don't find in the gallery (non-gallery)".

Manage → Provisioning:

1. Provisioning mode: "Automatic"
2. Admin credentials:
3. Tenant URL: "https://kund.learnifier.com/api/scim"
4. Secret token: "API key"
5. Test the connection.

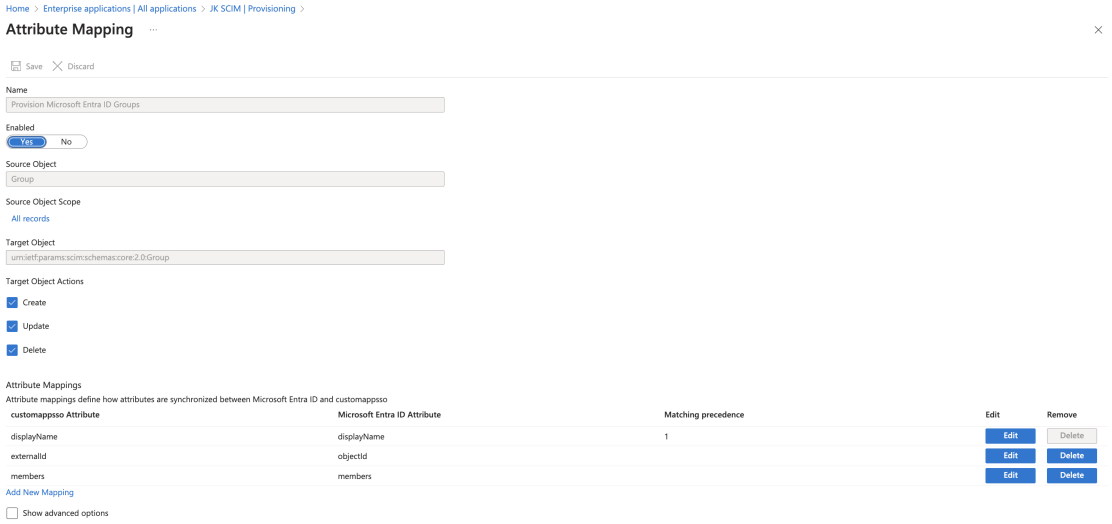

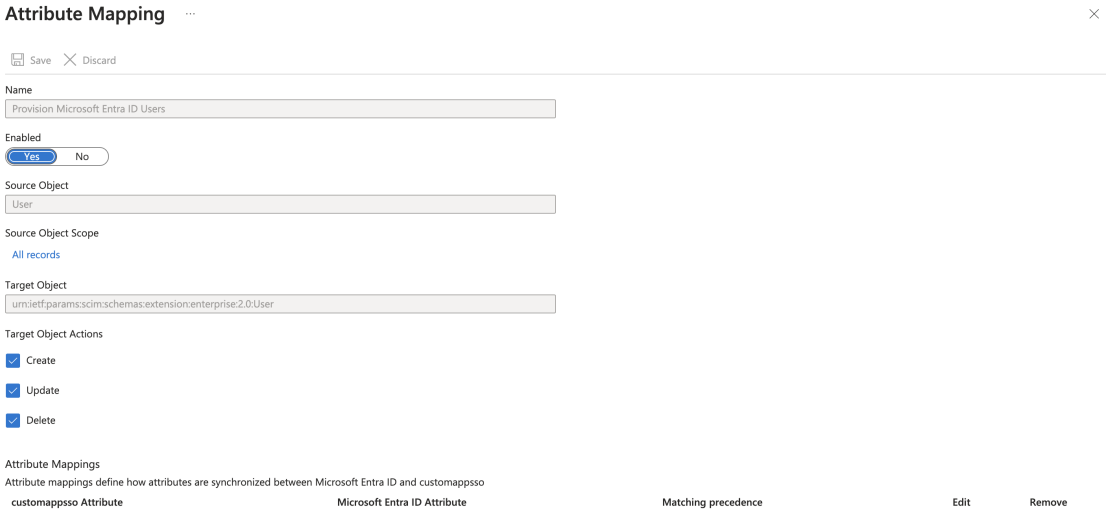

Note: If there is an error during synchronization, you can set up notifications for who should receive messages.

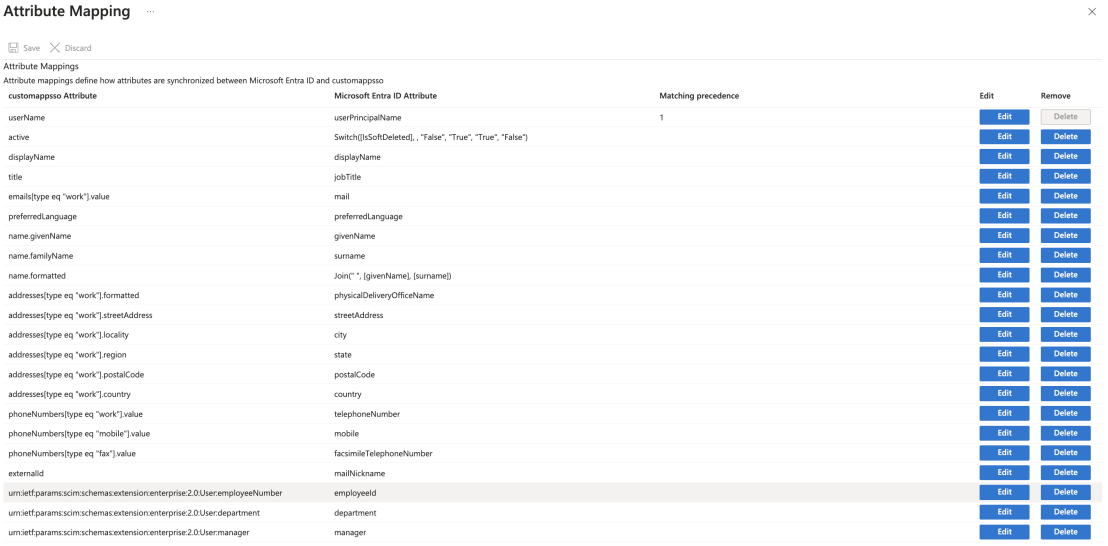

Next step after saving:

1. Go to “Mappings”.

2. Set up groups and users that you want to transfer.

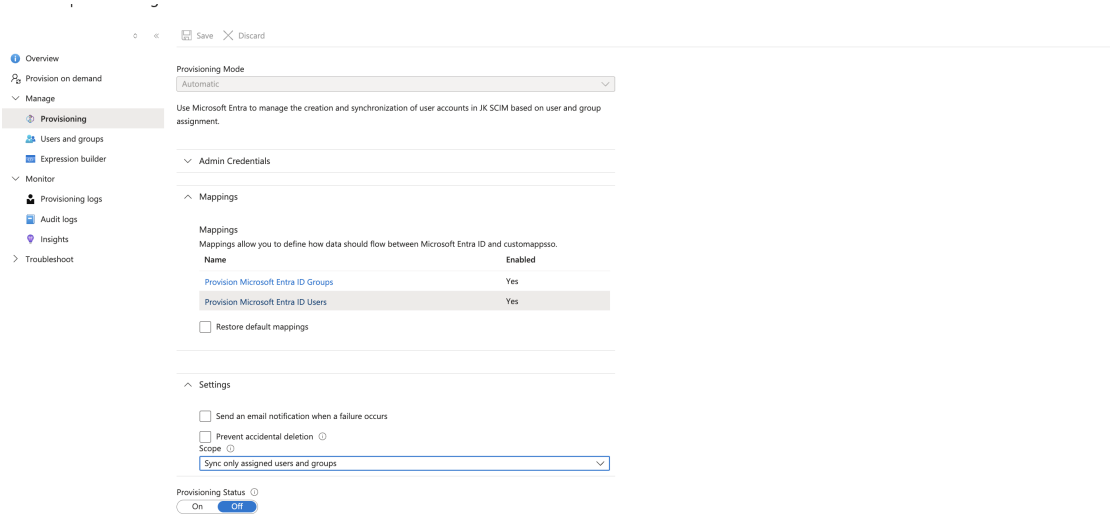

Note: If you wish to set up more fields on a user, we first need to do it on our site.

1. Activate (change from “Off” to “On”).
