How to use our Aivaton integration

Ester Andersson - 2024-02-16 - Functions

With the integration, a certificate is automatically created in Aivaton for all of your Learnifier courses. So, when a learner successfully completes a course in Learnifier, Aivaton gets the memo. As soon as a project is created, Aivaton generates a certificate that's tailored to that course and when a participant is marked as completed, the certificate is automatically sent to the learner.

Please note: the integration is an add-on that can only be activated by contacting Learnifier's support. If you would like to read more about the integration, please click here.

Here's how you can use the integration:

1. Log into your certificate management page via the link you have received. The first page will show you an overview of the latest statistics.

1. If you go to the "Projects" tab, you will find information about how many learners have received a certificate for each course.

1. If you would like to customize a certificate, click on the "Edit" button next to it under the "Projects" tab and edit it as you like.

1. When a participant completes a course, they will receive an email that contains a link to the certificate, which looks like this (see below). It is from this page that they can share their certificate on social media.
