

## Inviting participants

Ester Andersson - 2024-10-27 - Getting started

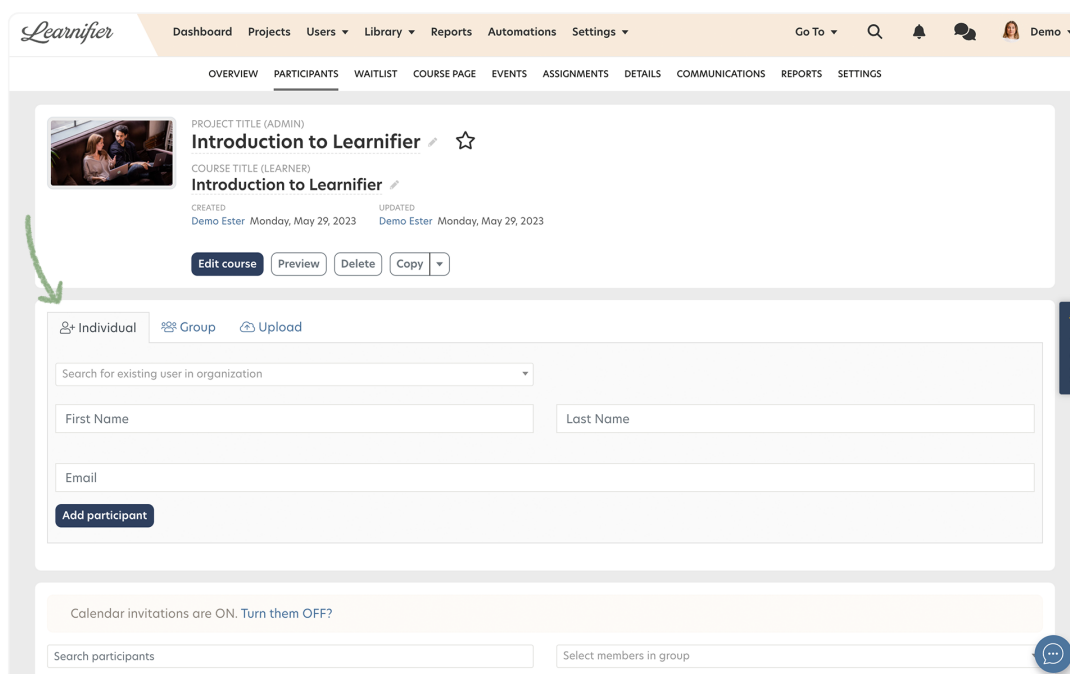

There are several ways to invite participants, and in this article, you'll learn all of them!

Note

- [Manually](#)
- [Via list](#)
- [Self-reg](#)
- [Catalog](#)
- [Automations](#)

### Manually

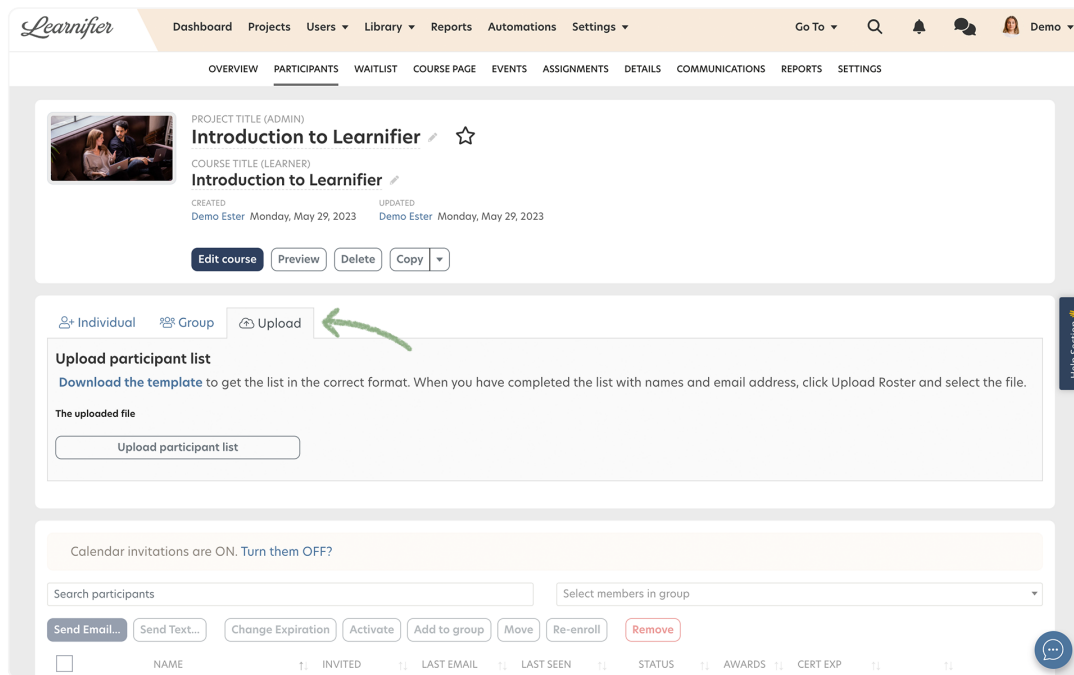

Enter the participant's first name, last name, and email address under "participants" → "individual". Select the participant you wish to invite in the participant list and click "Send email".

### Via list

Download the template that can be found under the "Upload" tab and enter the

participants' information (first name, last name, e-mail address, and telephone number with country code). Click "Upload participant list" and send an invitation email!

The screenshot shows the Learnifier interface for a course titled "Introduction to Learnifier". The top navigation bar includes "Dashboard", "Projects", "Users", "Library", "Reports", "Automations", and "Settings". The main navigation tabs are "OVERVIEW", "PARTICIPANTS", "WAITLIST", "COURSE PAGE", "EVENTS", "ASSIGNMENTS", "DETAILS", "COMMUNICATIONS", "REPORTS", and "SETTINGS". The course details section shows the project title "Introduction to Learnifier" and the course title "Introduction to Learnifier", both created and updated by "Demo Ester" on "Monday, May 29, 2023". Below this are buttons for "Edit course", "Preview", "Delete", and "Copy".

The "PARTICIPANTS" tab is active, and the "Upload" button is highlighted with a green arrow. The "Upload participant list" section includes a "Download the template" link and a "The uploaded file" section with an "Upload participant list" button. Below this is a section for "Calendar invitations" with a toggle switch set to "ON" and a "Turn them OFF?" link. The bottom section features a "Search participants" input field, a "Select members in group" dropdown, and buttons for "Send Email...", "Send Text...", "Change Expiration", "Activate", "Add to group", "Move", "Re-enroll", and "Remove". A table header is visible at the bottom with columns: NAME, INVITED, LAST EMAIL, LAST SEEN, STATUS, AWARDS, CERT EXP.

## Self-reg

Participants can also self-register for a course. All you have to do is send them the specific link or QR-code under the "Course Page" tab → "Register". Remember, anyone with the link or code can sign up for the course. You can also brand the self-registration page so it resembles the course. Set an appropriate title and description, as well as a background image, or color by clicking "Edit course page".

Note: you can choose to have your self-registration link moderated. If learners sign up for a moderated course, they will be registered in the course, but not activated. To be notified when a learner signs up, you can set up an [automated communication](#).

## Catalog

In the catalog, participants can easily apply for courses by searching for the course in the catalog and then clicking on "Register now". You decide whether an administrator or team manager needs to approve or if the course should be open for all learners in your learning platform. The catalog is only visible to registered users, which means that a user must have been invited to one of your courses to access the course directory. [Read more here](#) about how to use the catalog.

## Automations

By adding so-called custom fields\*, you can set up a process that automatically enrolls everyone who has the role of "X" (for example "Manager") in a specific course.

Go to the "Automations" tab and click "Add automation". Choose "Normal mode" if only one rule needs to be fulfilled for the enrollment to happen, or "Advanced mode" if several rules need to be fulfilled. On the "Advanced mode", you can also create different rules "in one", by combining "And" and "Or" rules. An example would be that everyone from a company that is either based in Sweden or Norway should be enrolled in a course (see example below)

The screenshot shows the 'Add automation' form in the Learnifier application. The form is titled 'Add automation' and is set against a background of the application's dashboard. The dashboard includes a navigation bar with 'Dashboard', 'Projects', 'Users', 'Library', 'Reports', 'Automations', and 'Settings'. The 'Automations' tab is active, and the 'Add automation' form is displayed in the foreground.

The form contains the following fields and options:

- Name:** A text input field containing 'Everyone at Learnifier gets Brand Guide'.
- Status:** A toggle switch set to 'Live'.
- Rule:** A dropdown menu set to 'Normal Mode'. Below it, a message states 'The current rule matches 13 users.' A rule configuration bar shows 'Company' selected in a dropdown, followed by an equals sign and another dropdown set to 'Learnifier'.
- Actions:** A dropdown menu set to 'Enroll matching users to project'. Below it, a dropdown menu is set to 'Learnifier - A Style Guide'.
