Sticky Completion

Ester Andersson - 2024-02-15 - Functions

When a participant has completed an assignment that allows retaking (for example a quiz or scorm file), we will present the highest score and result. This means that if a participant has completed a quiz and thereafter retakes the quiz, we will keep the completion status "Completed" and present the highest score (regardless if the participant will get fewer points on a later attempt).

Example:

Attempt 1: The score result is 7 out of 10 points

Attempt 2: The score result is 10 out of 10 points

Attempt 3: The score result is 8 out of 10 points

The result you will see:

10 out of 10 points.
