Communications to notify Managers and Team members

Admins can set up [Automated communication](#) to keep both managers and learners(team members) informed.

For example:

1. Notify managers when a team member applies for a course.
2. Notify learners when their course application is approved.

To enable notifications, create an **Automated Communication** with these triggers:

1. When a Team member has requested to take a course

Audience: Team Manager

Participant → Status → Is not Activated and Participant → Source → Is Course Catalog

2. When a Team manager has approved a request to take a course

Audience: Participant

Participant → Status → Is Activated and Participant → Source → Is Course Catalog
