We've launched an AI quiz generator!

2024-06-10 - Ester Andersson - Product Highlight

We are excited to announce the launch of our AI-based quiz generator!

This new function can generate up to 10 questions based on text content from your Learnifier project. The questions are simple multiple-choice with one correct answer, automatically set for you. Administrators can modify the generated quiz to tailor it to their needs.

Benefits of using AI to generate quizzes:

- **Time-Saving**: Quickly create quizzes without spending hours manually crafting questions.
- **Consistency**: Ensure similar quality and difficulty across quizzes, enhancing the learning experience.
- **Customization**: Easily edit and adjust questions to better fit your specific educational goals.
- **Enhanced Learning**: Provide immediate, automated assessments to reinforce learning material.

The feature is released in a beta version and is available on all pricing plans at no extra cost. If you are interested in trying the AI quiz generator, please contact your Customer Success Manager or our support team at support@learnifier.com.
