

Course templates

Ester Andersson - 2024-08-08 - Biblioteket

In this article, we'll go through why you should use course templates and the different ways to do it.

Why use course templates?

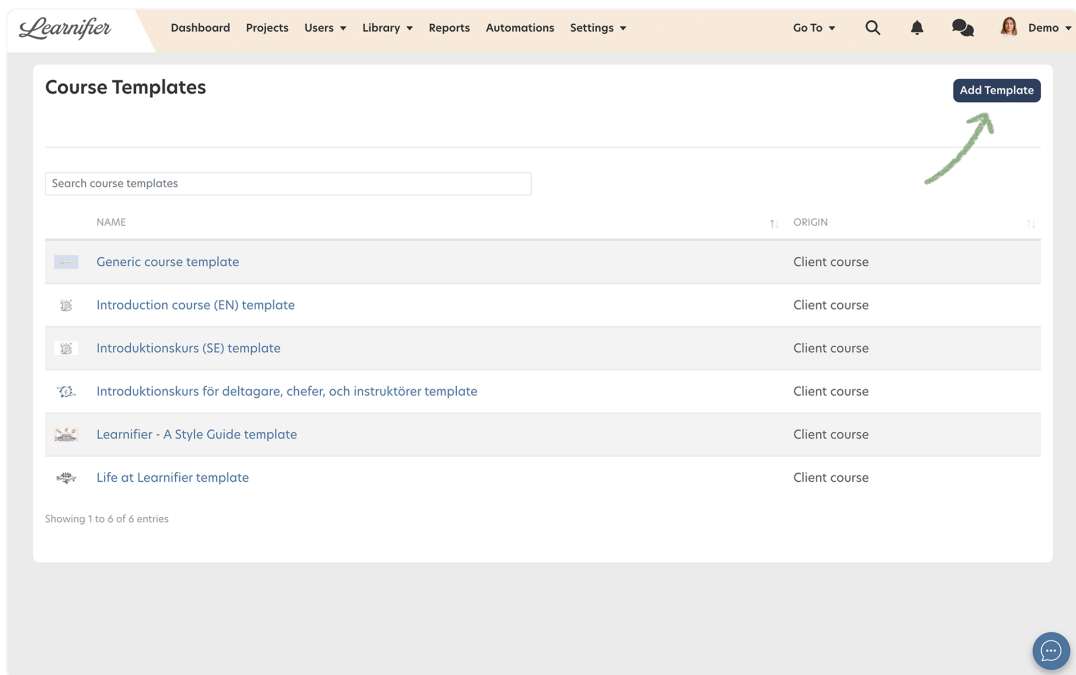

Course templates are useful if you have several courses with similar structures. If you update content blocks such as images, videos, quizzes, surveys, and HTML-text blocks in the course template by clicking the "Edit button" all courses that use the course template will be updated. However, if you add something new to the course template, this will only affect future courses based on the template. Remember, if you update normal text blocks, this will also only affect future courses based on the template.

Create a course template from scratch

1. Go to Library → Course Templates

1. Click on "Add Template"

1. Set a name, description, language and (not mandatory) an expiration and click "Save course design".

Learnnifier Dashboard Projects Users Library Reports Automations Settings Go To Q Bell Chat Demo

Course design settings

Name
Introduction course

Description
This is a course template of an introduction course.

1. Create your course template!

Create a template from a project

1. Go to the project you want to copy.
2. Click on the triangle pointing down at the right side of the "Create copy"
3. Choose "Create template". You will automatically be redirected to the new course template.

Updating materials in course templates

If you update content blocks such as images, videos, quizzes, surveys, and HTML-text blocks in the course template by clicking the "Edit" button (see below), all courses that use the course template will be updated. However, if you add something to the course template, this will only affect future courses based on the template.

The screenshot shows the 'Introduction course (EN) template' editor. The top navigation bar includes 'Back', 'Undo', 'Redo', 'Save', and 'Preview'. Below this are tabs for 'INTRO', 'ACTIVITIES', 'RESOURCES', 'SETTINGS', and 'COMMUNICATIONS'. The left sidebar contains a tree view of course sections: 'Introduction' (Welcome!, Tip from Erika), 'Let's get started' (Portals and roles, The admin portal, The instructor portal, The learner portal), and 'Create and administrate' (What does a course consist of?, Add a new project, The course builder). The main content area is titled 'Settings' and shows 'All Components' with a progress indicator of 33% | 66%. A green arrow points to an 'Edit' button on a preview window titled 'The admin portal'. The preview window shows a 'New Project' form and a 'Favorite Projects' list. A 'Segment' button is visible in the top right of the main content area.

This is an example of how a generic course template can look:

The screenshot shows a course preview for 'Introduction to Learnifery'. The top bar indicates 'You are previewing the course "Introduction to Learnifery."' and includes an 'Unlock activities' button. The navigation tabs are 'INTRO', 'ACTIVITIES', and 'RESOURCES'. The left sidebar shows a list of activities: 'Introduction' (In progress), 'Welcome!', 'Tip from Erika', 'Let's get started', 'Create and administrate', 'Video editor', 'Communication', 'Invite participants', 'Follow up progress', 'Support', and 'Thank you!'. The main content area is titled 'Tip from Erika' and contains a paragraph of text followed by a bulleted list of tips. The bottom of the page has 'Previous' and 'Next' buttons. Progress indicators show 'Completed: 0 of 0' for both the activity and the course.
