Updates & Improvements to the Learner Interface – 7/2-2025

2025-02-09 - Gabriella Eriksson - Release notes

Introducing updates to the New Learner UI, designed to enhance usability and create a more seamless, user-friendly experience.

- **Wider Single-Column Layout**: Aligns the single-column width with multi-column layouts for smoother navigation and consistency. As a result, the course player appears less monotone, creating a more visually engaging experience.
- **Larger Media Display:** Bigger images and videos improve visibility and enhance the learning experience.
- **Clearer Completion Button:** The ‘Mark as Completed’ button is now more prominent, easier to find, and functions as a toggle instead of a button, making progress tracking more intuitive.
- **Updated ‘Optional’ Icon:** The redesigned ‘Optional’ icon for activities and components improves clarity and visibility, helping learners easily identify optional tasks.
