Maximize the value of your premium content

2024-09-27 - Gabriella Eriksson - Product Highlight

Merge course templates to streamline course creation and ensure consistent quality.
Creating engaging, high-quality courses doesn't have to be time-consuming. Whether you're setting up new courses or refining existing ones, our new feature equips you to easily reuse your top-quality content across multiple courses, ensuring that your most effective materials always reach your learners.

Administrators can now pull activities & modules, resources, and automated communication workflow from existing templates, enabling them to set up new courses swiftly and efficiently.

Key Benefits:

- **Efficiency**: Save time and eliminate manual effort by quickly replicating courses. Admins can pull activities, modules, and resources from existing templates, enabling them to set up new courses swiftly and efficiently.

- **Consistency**: Provide a seamless experience by leveraging predefined templates. Automated communications and resources ensure that every course follows a consistent structure, simplifying course management for admins and learners alike.

- **Customization**: Elevate course quality by integrating the best elements from multiple templates. Admins can continuously refine the learning experience and tailor each course to meet the evolving needs of their learners. Plus, ensure your top-quality content is reused effectively to maintain a high standard across all courses.

With these new capabilities, admins can efficiently create consistent, high-quality courses while maintaining the flexibility to customize for continuous improvement, all while maximizing the value of your best content.
