# Brand new image editor

2024-08-07 - Ester Andersson - Product Highlight

Great images can take your courses to new heights! Our brand-new image editor allows you to edit your images directly in the tool. Crop, rotate, zoom in or out, reverse... you name it!

Using our image editor can be very helpful if you want to ensure that all of your images are the same size, or if you need to rotate an image taken with a mobile phone.

You can edit already uploaded images in the course builder by holding your mouse pointer over the image and then clicking on the blue pen icon. To edit an uploaded image in the library, click the "actions"-button and click "edit".

PS: Have you missed our integration with Unsplash? You now have access to over 2 million images directly from Learnifier!
