# Release Jan 10, 2024

2024-01-10 - Ester Andersson - Release notes

**Admin:**

- In the quiz builder tool, remove HTML tags from title fields. This action will ensure that when accessing the quiz builder, any existing HTML in title fields is cleared. Note that the quiz builder may still insert new HTML until the frontend issue is resolved.
- Implement a webhook for notifying participation movement.
- Address the issue where uploaded pictures in user registration are saved but not displayed.
- Rectify the problem with reserved slots, where the user ID is missing in the convert endpoint response.
- Resolve the webhook triggering for project updates when there are changes in waitlist settings.
