

Auto-enrollment upon course completion

Ester Andersson - 2024-10-27 - Functions

Auto-enrollment upon course completion is a function that lets the system automatically enroll a learner in a new course when another course is completed.

1. Go to the course you want your learners to complete to be enrolled in another.
2. Under "Next course", click "Add next course". Choose the course your learners should be enrolled in.
3. Create an automated communication in the next course to let the system automatically send a welcome email to all registered participants (not mandatory).
4. Your learners now have access to the course!

The screenshot shows the Learnifier interface for the 'Introduction to Learnifier' course. The top navigation bar includes links for Dashboard, Projects, Users, Library, Reports, Automations, and Settings. The course overview section shows the course title, creation and update dates, and buttons for Edit course, Preview, Delete, and Copy. The participants section displays a progress chart with 9 participants, categorized by status: Not Started (5), In Progress (3), Completed (1), On Track (9), Overdue (0), Not Invited (0), Bounce Backs (0), and Project Errors (0). The 'Next Course' section, highlighted with a green arrow, contains the text 'Automatically enroll Learners that have completed this Course to the following Next Course:' and an 'Add Next Course' button. Other sections include Awards, Project Team, and Announcements.
