

Auto-enrollment upon course completion

Ester Andersson - 2024-02-15 - Functions

Auto-enrollment upon course completion is a function that lets the system automatically enroll a learner in a new course when another course is completed.

1. Go to the course you want your learners to complete in order to be enrolled in another.
2. Under "Next course", click "Add next course". Choose the course your learners are to be enrolled in.
3. Create an automated communication in the next course to let the system automatically send a welcome email to all registered participants (not mandatory).

The screenshot shows the 'Introduction to Learnifier' course page in the Learnifier system. The page is titled 'Introduction to Learnifier' and is in an 'Ongoing' status. It features a navigation bar with options like 'OVERVIEW', 'PARTICIPANTS', 'WAITLIST', 'COURSE PAGE', 'EVENTS', 'ASSIGNMENTS', 'DETAILS', 'COMMUNICATIONS', 'REPORTS', and 'SETTINGS'. The main content area includes a '9 participants' section with a progress chart showing 5 Not Started, 3 In Progress, and 1 Completed. There are also sections for 'Awards', 'Next Course' (with a green arrow pointing to the 'Add Next Course' button), 'Project Team', and 'Announcements'. The 'Next Course' section is highlighted with a green arrow, indicating the focus of the tutorial.
