## **Preview - Important to Know**

A Latimore - 2025-10-08 - Trouble shooting

When you preview a course in Learnifier, it's important to understand that where you preview from makes a difference:

## • [] From the project page:

If you click Preview here, you'll see the **LIVE version** of the course – even if you haven't published your latest changes yet.

## • $\square$ From the course builder:

If you click *Preview* inside the course builder, you'll see **the unpublished version** – meaning how the course looks with your most recent edits.

## ☐ Tip:

Want to check your latest changes before publishing? Use *Preview* from the course builder. Want to see what participants are currently seeing? Use *Preview* from the project page.

An even better way to see *exactly* what participants see is to **add yourself as a participant in the course** – that way, you'll experience it just like a learner would.
