Quiz

Ester Andersson - 2024-07-25 - The library

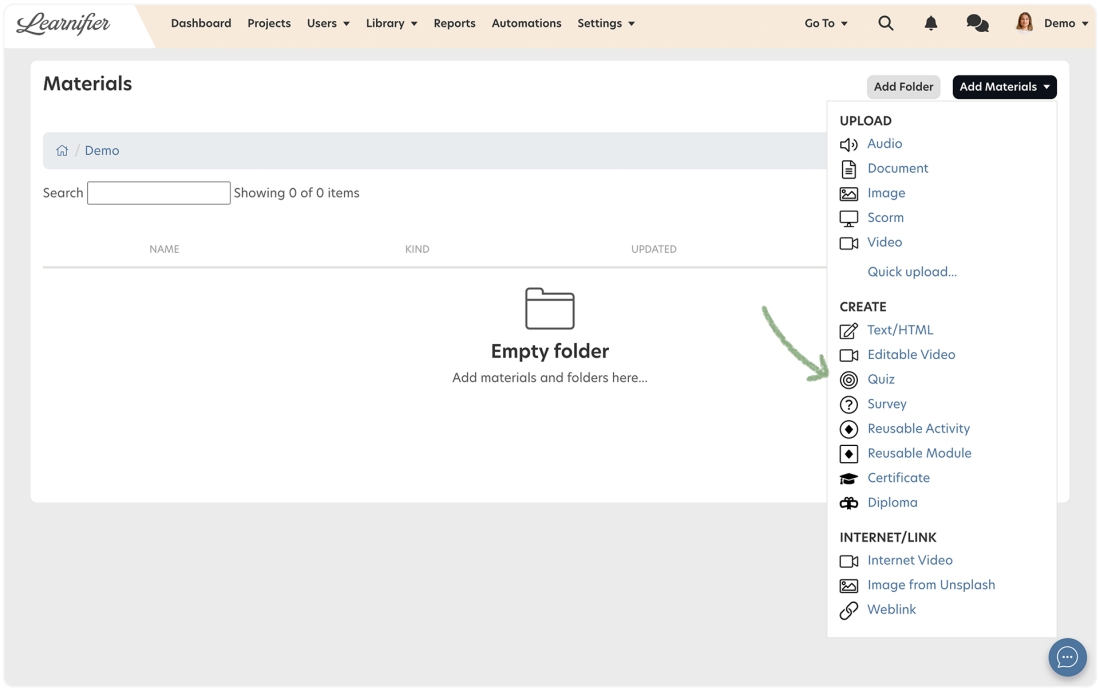

Learnifier's platform enables easy creation of quizzes for various educational purposes. This guide explains how to add content, name your quiz, edit questions, incorporate multimedia, and adjust settings like scoring and review options, providing a comprehensive toolset for crafting effective assessments.

Note

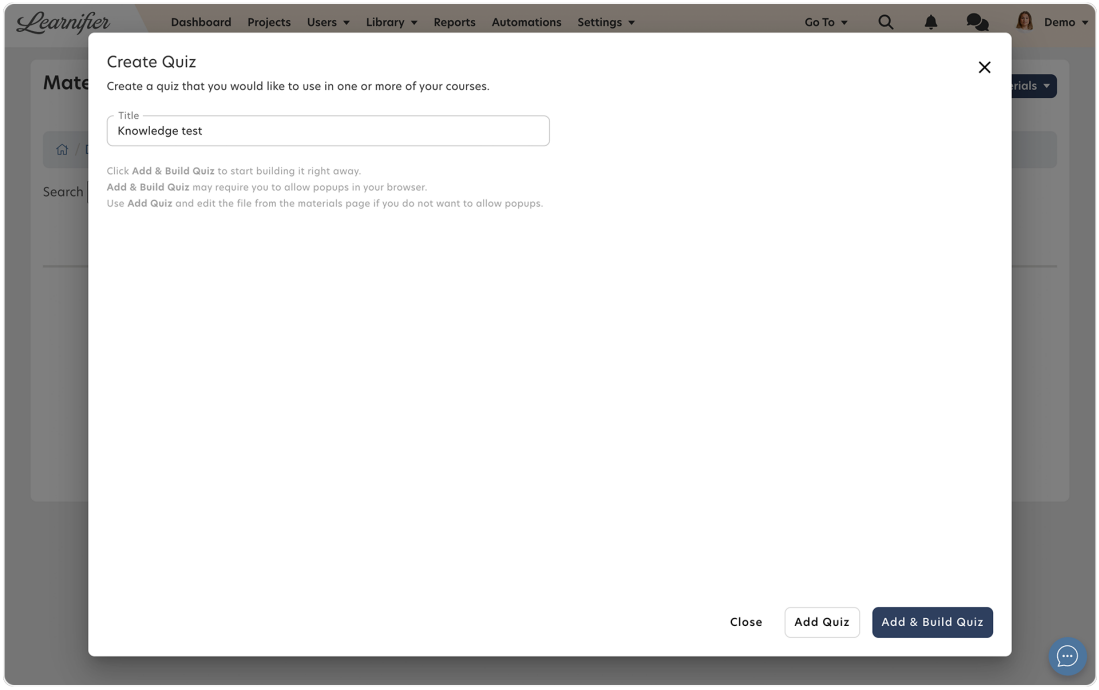

- Building the quiz (in the library)
- Building the quiz (in the course builder)
- Editing the quiz
- Quiz settings
- Generate quizzes with AI (BETA)

Building the quiz (in the library)

1. Click "Add materials" and choose Quiz.

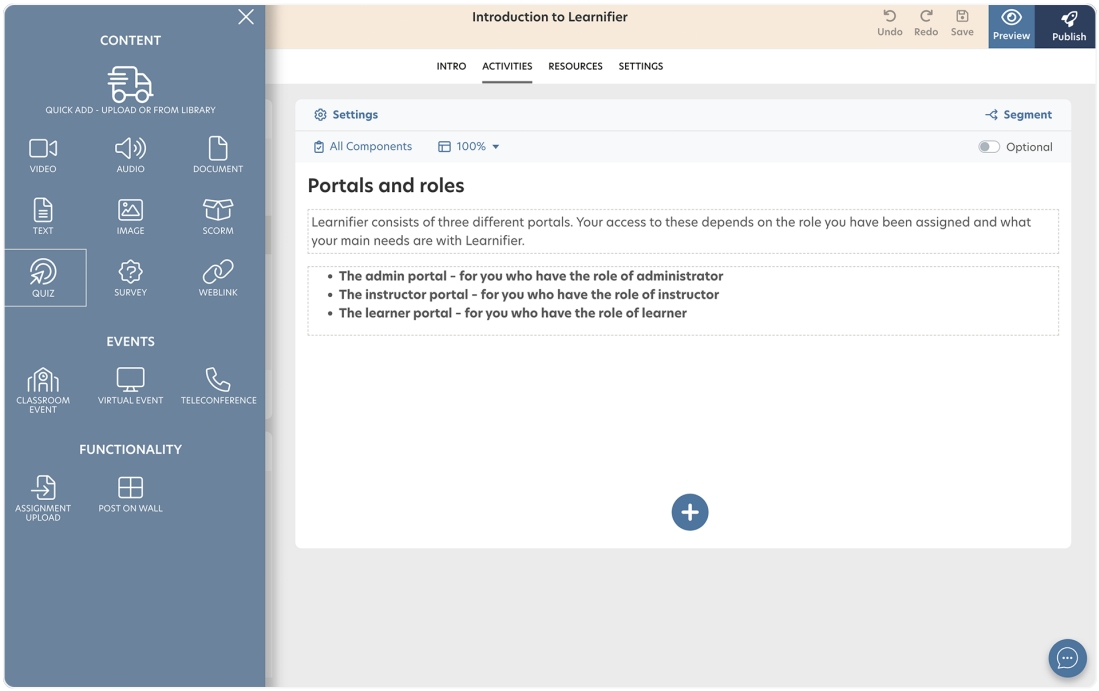

1. Set a title and click “Add & Build Quiz”.

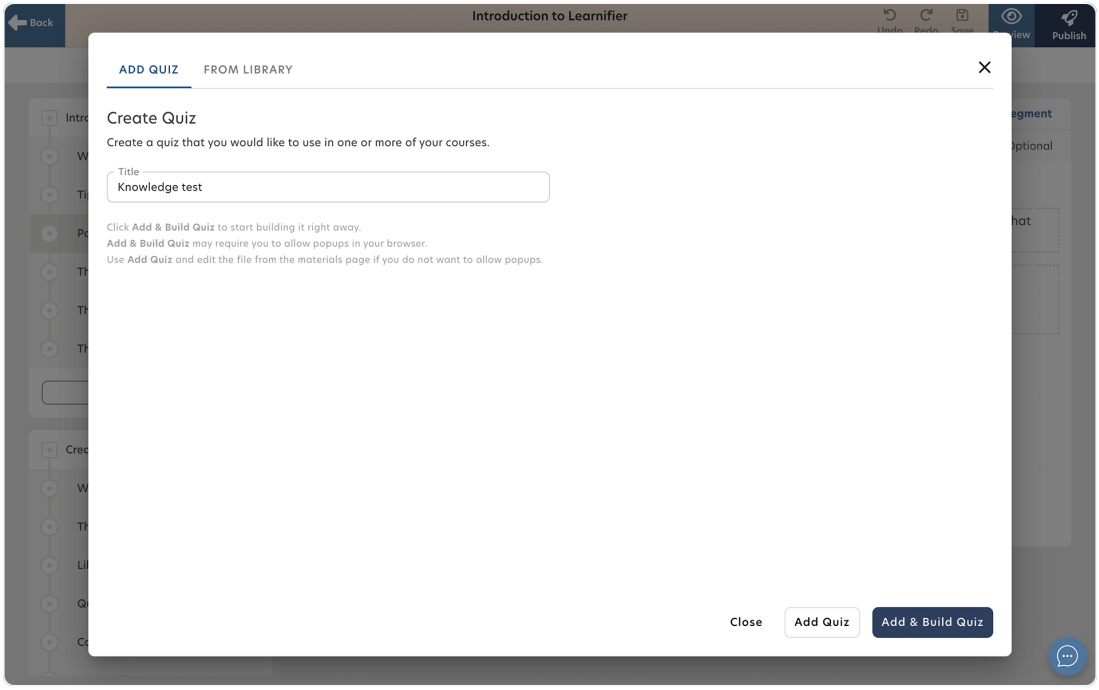

Building the quiz (in the course builder)

1. Click on the plus sign and choose “Quiz”.

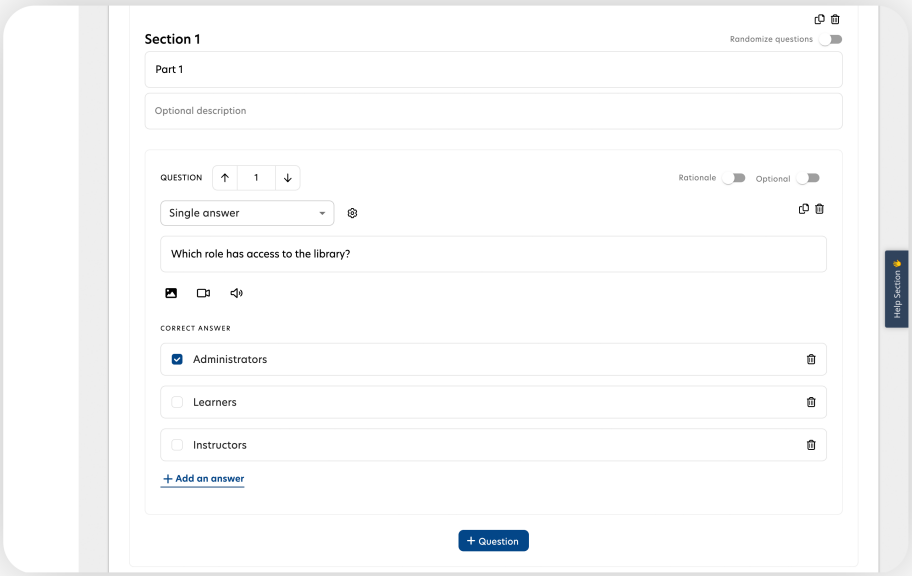

1. Name the quiz and click “Add & Build Quiz”.

Editing the quiz

1. Set a page title and an (optional) description
2. Set a section title and (optional) description
3. Write your question in the “Question title” box

1. If the question only has one correct answer, choose “Single answer”; if it has multiple correct answers, choose “Multiple answer”. Select the correct answer/s by checking the box “Correct answer”

- To add a new question, click “+Question” and choose what type of question you wish to add.

- Adding media to your questions, such as images, videos, or audio files, is possible. Simply click on the media you wish to add under the question title.

Quiz settings

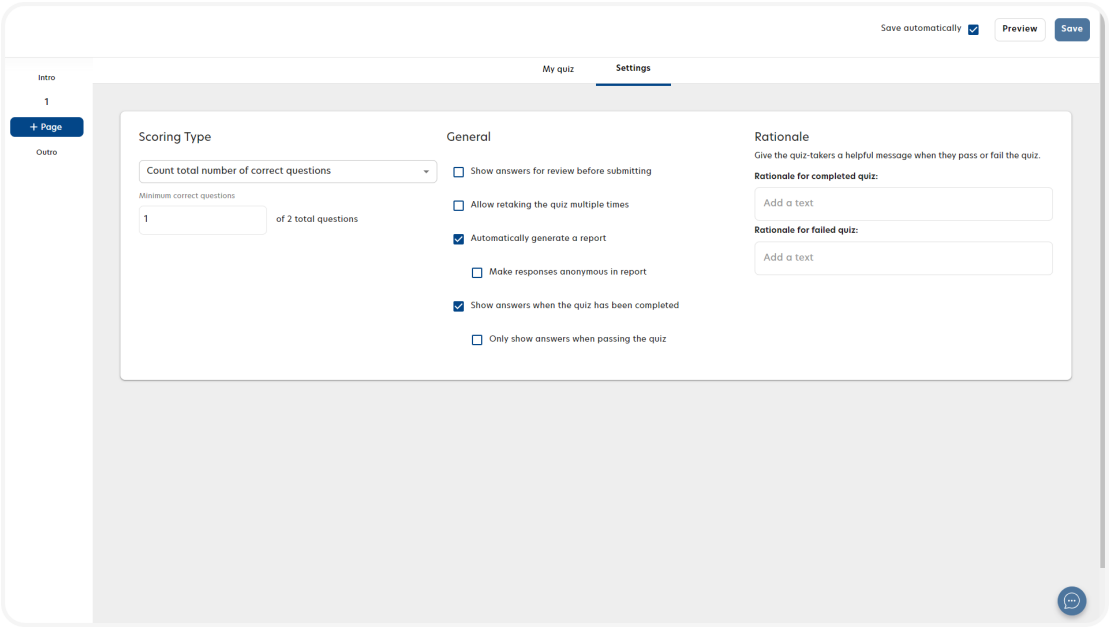

Under “Settings” is where you set the scoring type, the general settings, and an overall rationale.

Scoring type

- **Count total number of correct questions:**

    - Multiple choice questions: the user will get +1 point when she/he chooses one or more correct alternatives and -1 point when she/he chooses one or more wrong alternatives. The maximum scoring for this kind of question is +1 and the minimum is 0 points.

    - Single choice questions: the user will get +1 point for each correct answer and 0 points for wrong answers.

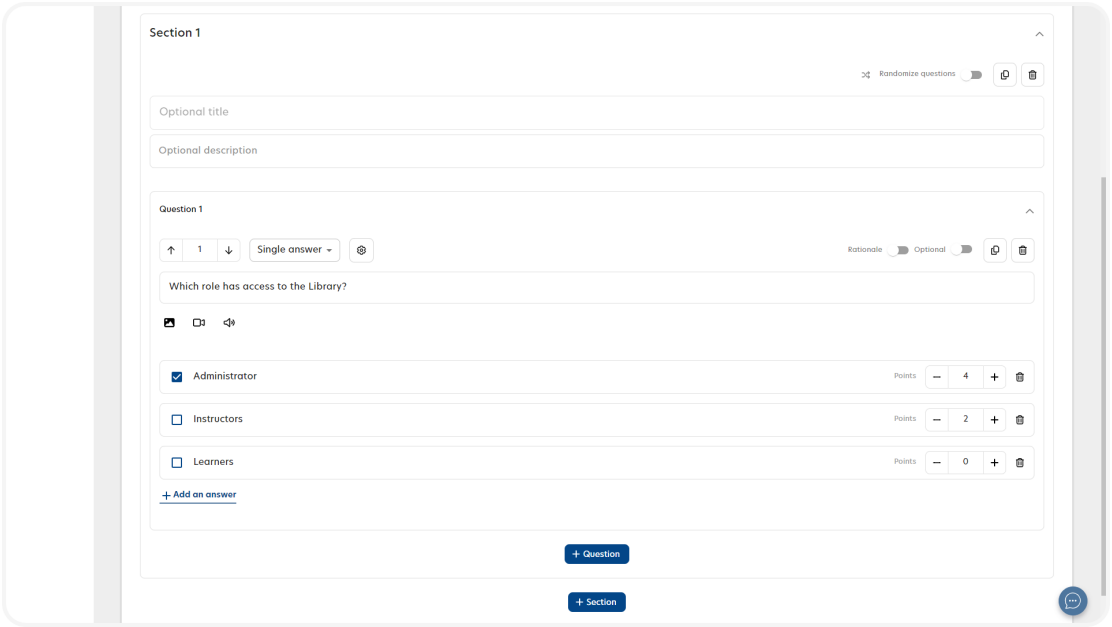

- **Count the total number of points for all answers:**

    - Multiple choice questions: the user will get the sum of the points you have entered as ”value" in ”Settings” for the chosen alternatives.

    - Single choice questions: the user will get the number of points you have entered as ”value" in ”Settings” for the chosen alternative.

General

Show answers for review before submitting: The participants will be able to see what they have answered

Allow retaking the quiz multiple times: The participants will be able to take the quiz more than one time

Show answers when the quiz has been completed: The participants will be able to see their answers when they have completed the quiz

Automatically generated report: A report will automatically be generated

Make response anonymous in report: The participants' names will not be visible in the report

Rationale

Rationale for completed quiz: Text shown to participants who passed the test

Rationale for failed quiz: Text shown to participants who failed the test

Generate quizzes with AI (BETA)

1. **Add Quiz:** Press the + and select the quiz content type.

2. **Choose "Generate with AI":** Click on the "Generate with AI" option to use the AI function.

3. **Select the number of questions:** Specify how many questions you want the AI to generate (up to 10 maximum).

4. **Review the questions:** Review them carefully After they have been generated. You can directly use the generated questions or edit them to adapt them to your course.

ATTENTION! Please remember the information below when using this feature:

Even though we use a version of AI that is not trained on the content of your courses, this function should never be used in courses that contain personal data or other sensitive information. The security and integrity of this data are of utmost importance.
