Teamtailor

Ester Andersson - 2024-06-18 - API, SAML, integrations and general settings
Note

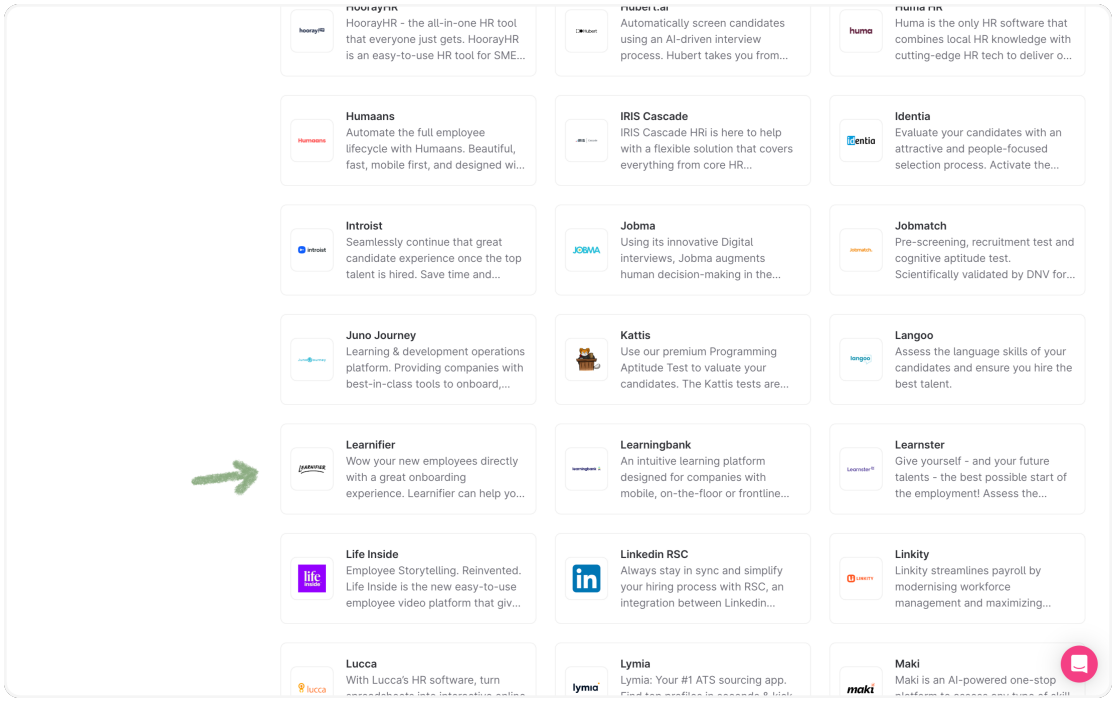

- How to activate the Teamtailor integration
- How to use the Teamtailor integration

How to activate the Teamtailor integration

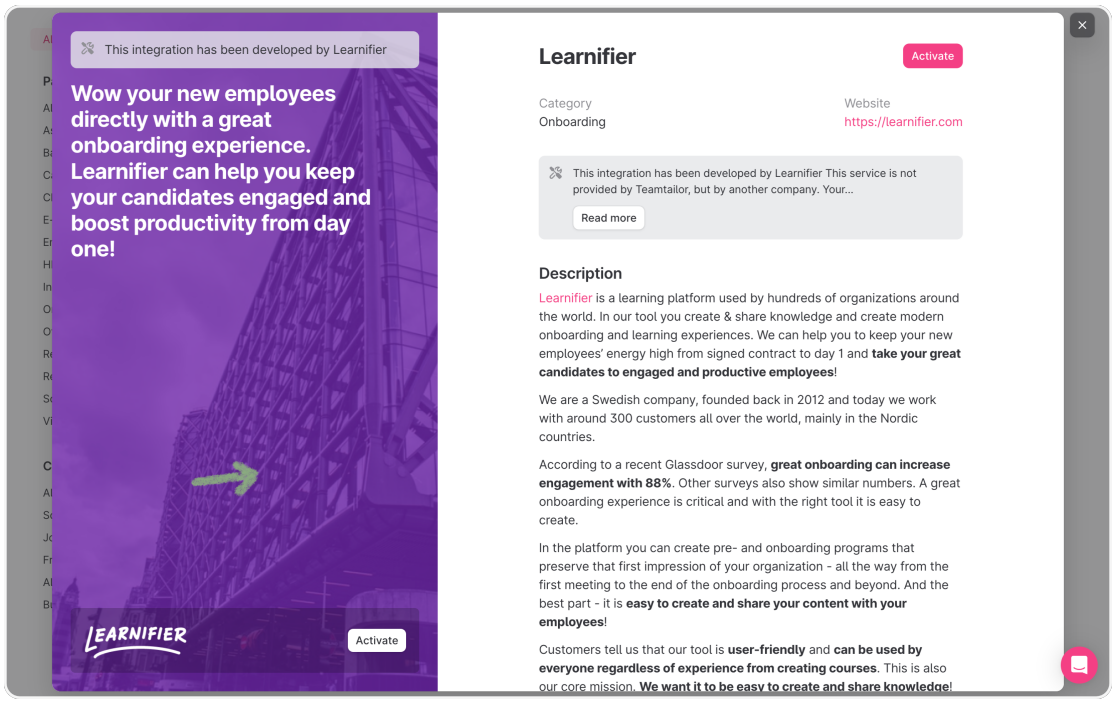

1. Go to “Settings” and “API” in the administrator interface. Click activate and copy the API key.

1. Go to the Teamtailor marketplace and scroll down to Learnifier.

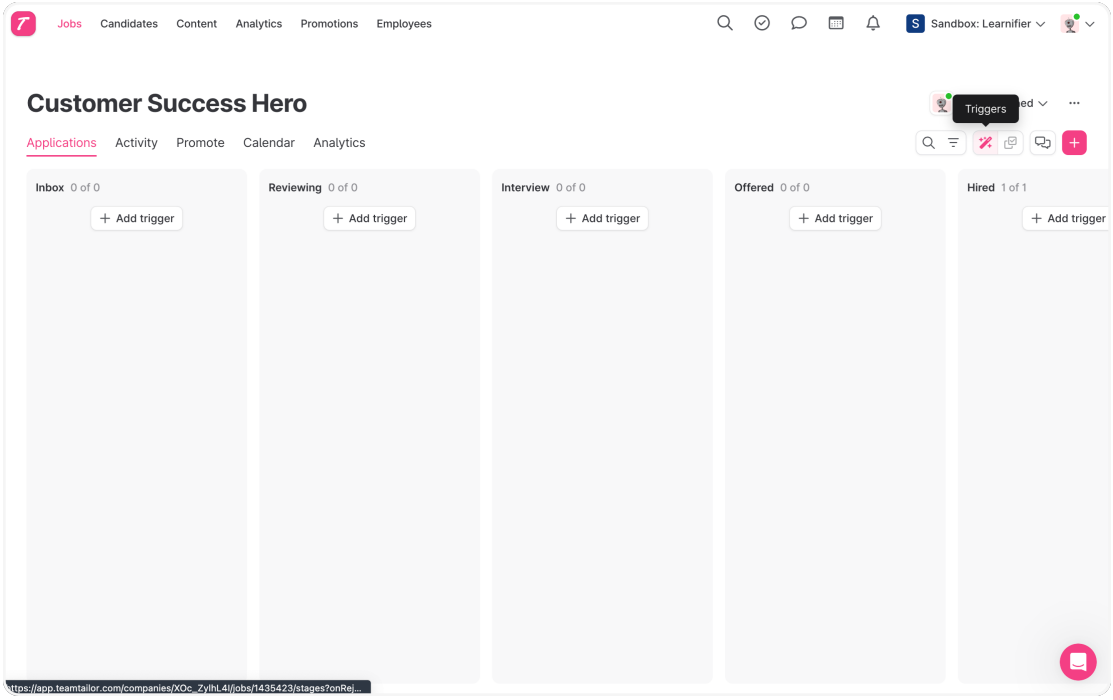

1. Click activate and add the API key.

1. Now, you're all set!

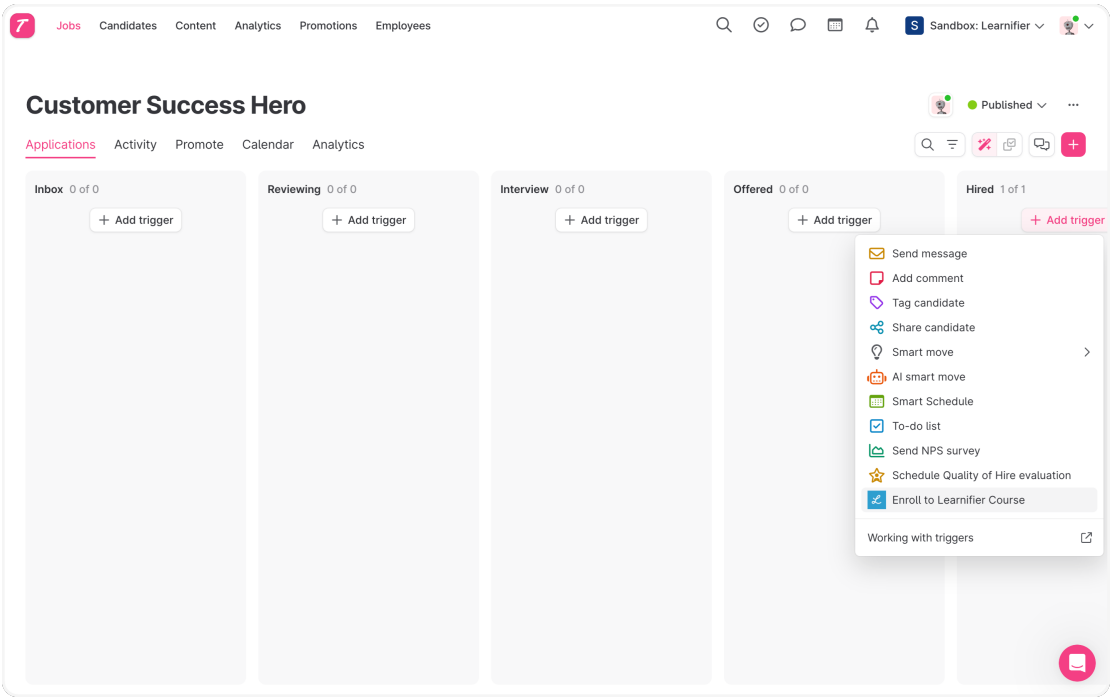

How to use the Teamtailor integration

1. Go to one of your jobs in Team Tailor and click "Triggers".

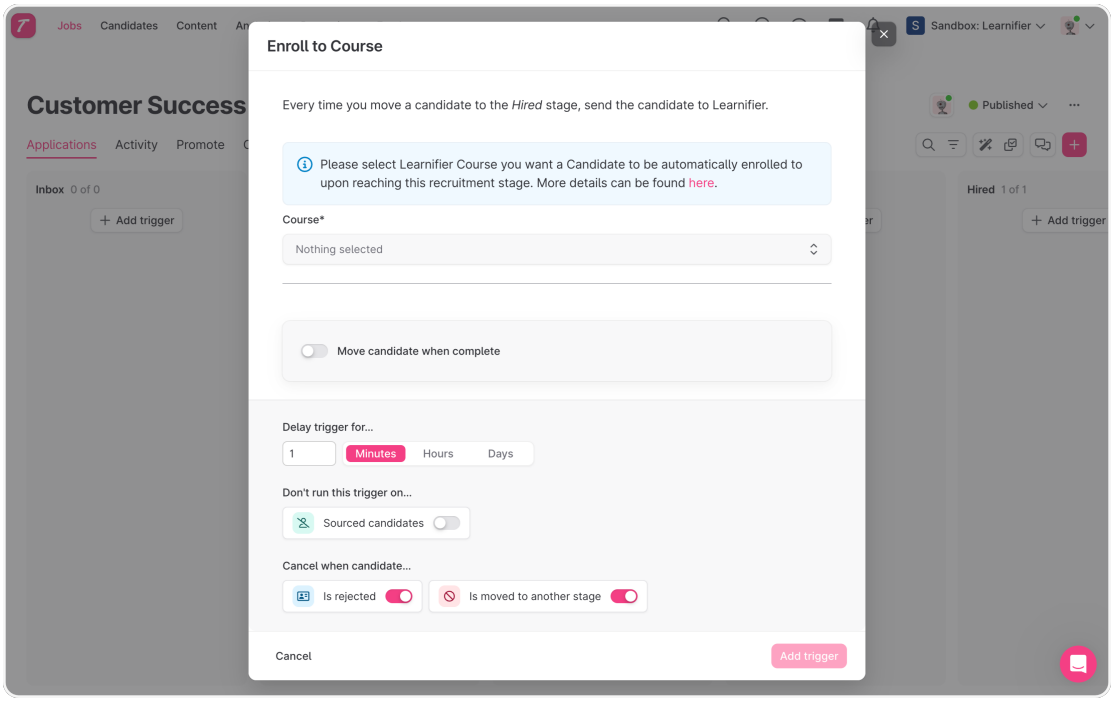

1. Under "Interview", click on the and choose "Enroll to course".

2. Thereafter, choose the course you would like to enroll your hired candidate in and thereafter click "Add trigger".

1. Choose the course you would like to enroll the candidate in.

1. To make sure that the course invitation has been sent, click on the candidate's profile after placing them in "Interview". If everything has worked, it should say "A trigger sent Course using Learnifier" in the right top corner.
