A faster way to create multiple courses

2026-10-05 - Gabriella Eriksson - [Product Highlight](#)

Managing a large number of courses or recurring training sessions can quickly turn into repetitive admin. With Bulk Upload, you can create multiple courses at once by preparing your course information in a file and uploading it to Learnifier.

Instead of creating and configuring each course individually, you can set up many courses in one go. That means fewer manual steps, faster setup, and more time for the work that matters.

When your training operations grow, your administration shouldn't have to grow at the same pace.

Ready to get started?

Follow our [step-by-step guide](#) to learn how to prepare your file and create multiple courses using Bulk Upload.

Bulk Upload is **included on the Enterprise plan** and as an **add-on on the Professional plan**.
