Coming soon: A new Learner Homepage

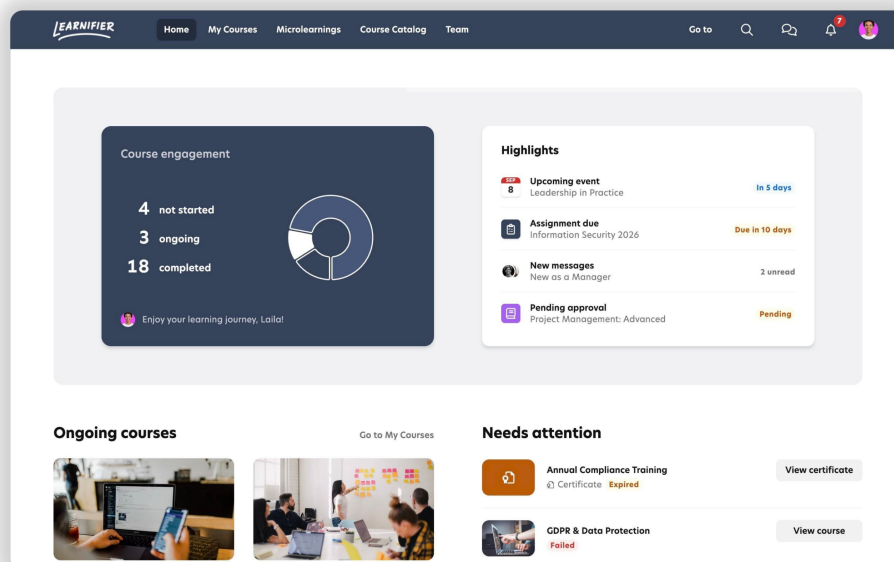

2026-09-04 - Gabriella Eriksson - [Product Highlight](#)

A new experience that makes it easier to find what matters.

On **September 16**, we're introducing a new Learner Homepage in Learnifier, designed to provide a clearer overview and make it easier for learners to see what needs their attention, continue ongoing learning, and discover new content.

Depending on the features used in your Learnifier environment, learners will be able to see:

- **Course engagement** - a quick overview of courses that are not started, ongoing, or completed.
- **Highlights** - relevant information about upcoming activities, deadlines, and updates.
- **Ongoing courses** - quick access to courses already in progress.
- **Needs attention** - items that require the learner's attention or action.
- **Recently added courses** - new courses available in the catalog.
- **Microlearnings** - short learning opportunities available directly from the homepage.

- The new Learner Homepage will become the default experience for all learners from **September 16**. *No action is required from you.*
- To have the new Learner Homepage activated in your Sandbox environment, contact your Customer Success Manager or support@learnifier.com.
