The time is near! Final Launch of the New Learner Experience - March 11!

2025-02-26 - Gabriella Eriksson - Product Highlight

March 11 is the day we will fully transition to the new learner experience, and the old interface will be phased out.

To ensure a smooth transition, we recommend taking a final look at your courses in the new interface.
Do you have custom **HTML or CSS**? If so, it's a good idea to double-check that everything works as expected.

What Does the New Interface Offer?

 Modern Layout and Navigation – An intuitive design with simplified navigation for a smoother and more enjoyable experience.

 Improved Accessibility – Designed to be more inclusive and compliant with Web Content Accessibility Guidelines (WCAG).

 Clearer Course Information and Completion Pages – A more accessible course information page and an improved course completion page for better visibility of progress and achievements.

 Optimized Course View – A cleaner, more focused layout that makes it easier to navigate and engage with course content.

 Streamlined Learning Flow – A collapsible step progress and more intuitive placement of resources make it easier to move through the course.

 More Visible Achievements and Rewards – Now displayed both on the course completion page and in settings.

 Enhanced Discussions and Notifications – Smoother interactions and clearer communication.

 Upgraded Header – An improved top menu where user settings and achievements are easier to access.

Will Anything Change Before the Launch on March 11?

The only remaining update before the launch is the support information page – everything else is already in place!

What Do You Need to Check?

- **Course Layout and Content** – Does everything look as expected?
- **Custom HTML/CSS** – Ensure that your customizations work properly in the new interface.

Review your courses today to make sure they're ready for launch!
