Release note: September 2025

2025-10-09 - Gabriella Eriksson - Release notes

Our release notes give you a quick overview of the latest features, improvements, and fixes. We want to keep you in the loop and help you make the most of Learnifier.

New!

Checkpoint Questions

Introducing our new content type: **Checkpoint Questions**.

Add interactive question blocks directly within an activity in your Learnifier course. Participants can reflect, make decisions, receive instant feedback, compare their responses with others, and track their progress — creating a deeper and more engaging learning experience.

Updates & Improvements

Refined Audience Selector in the Catalog Builder

- **Smarter logic and clearer language**

  Technical symbols have been replaced with plain, easy-to-read text.

- **Select multiple values within a rule**

  It's now possible to choose multiple values within a single rule for greater flexibility.

Team View BETA Enhancements

- The four data boxes in the right-hand column are now clickable, allowing managers to navigate directly to the relevant tab and table.
- Added search and filter functionality in the course view under the **Members** tab, making it easier for managers to find the right course to register their team members for.
- Added a **Download** button for awards. Managers can now view and download certificates or diplomas.

- All *Managed by Team* courses are now visible in the panel, including those without registered participants.
- Courses now correctly display availability instead of appearing as full.
- Numbers for team members and requests are now accurate.

Improved Accessibility

We continue to make Learnifier more accessible and user-friendly for everyone. Recent updates include:

- Added clear text for the **close button** in collection modals to improve screen reader clarity.
- Enhanced the **expand/collapse button** in the activity stepper with ARIA labels for better navigation.
- Introduced a **“skip to content” link** in the main header, allowing users to jump directly to the main content without extra clicks.

API

New endpoints have been added to the API, expanding its capabilities.

Performance, Safety & Stability

We’ve made several behind-the-scenes improvements to ensure Learnifier runs faster, more securely, and more reliably. Highlights include:

- Replaced and automated recovery for critical load balancers in our production environment.
- Added new monitoring tools to better observe and maintain production performance.
- Renewed domains and issued new security certificates.
- Optimized caching for the SCORM player, resulting in faster content loading for learners.
- Introduced a new database system for API trace logs, improving speed and reducing load on the main database.

Fixes

- Restored the Dashboard number font size to its original value.
