Translate with AI - New feature!

2025-06-02 - Gabriella Eriksson - Product Highlight

Knowledge shouldn’t be limited by language.

With our new AI-powered translation feature, you can now create translated versions of your courses automatically, quickly and with high quality. For more inclusive and impactful training, regardless of language or audience.

Greater accessibility and trust
When you meet participants in their own language, you build trust. It helps your message resonate more deeply and makes the learning more impactful – no matter where in the world your employees or customers are or what language they speak .

Ready to meet the world
Whether you're already operating internationally or planning to, AI translation becomes a key to scaling your training efficiently, without compromising on quality.

Save time and resources
Manual translation is time-consuming and costly. With AI, you get fast results, consistent tone and fewer errors. Making sure you can focus on content and impact.

Translate with AI **– Today!**

We invite everyone who has signed our AI agreement to try out the beta version of our translation feature! Go to the project page of the course you want to translate and find the option to '*Translate with AI*' in the overflow menu.

Haven’t signed the AI agreement yet?
Contact support@learnifier.com , and we’ll help you get started!

Please note: *This feature will not be available on all pricing plans after the beta-testing period.*
