Hailey HR integration: keep your people data in sync

2026-05-06 - Gabriella Eriksson - Product Highlight

Connect Hailey HR with Learnifier to eliminate manual work and keep your learning environment automatically up to date. Employee data flows directly into Learnifier, so the right people get access to the right training without extra admin.

Instead of maintaining user lists in multiple systems, you can rely on a single source of truth. When employees join, change roles, or leave, updates in Hailey HR are reflected in Learnifier. This makes it easier to manage onboarding, ensure compliance, and keep learning relevant across the organization. New employees automatically get access to the right onboarding program based on their role or department from day one.

For your teams, it means less time spent on administration and fewer errors. For your business, it creates a more scalable and consistent way to deliver learning tied to real organizational data.
