Product Update: Unified Header in the Admin and Back Office interfaces!

2025-05-05 - Gabriella Eriksson - Product Highlight

We've refreshed the header that displays the main menu at the portal level and in Back Office, focusing on a more cohesive visual experience!
The functionality remains the same, but the design has been updated better to match our refreshed look in the participant interface.

For those of you with access to Back Office, this means you'll now see the same header and menu system as in other parts of the platform.
This reduces visual differences between views and makes navigation smoother and more intuitive.

Same functionality, but a sleeker and more consistent experience!
